

Journal of Mathematical Analysis and Applications

EDITORS

STEVEN G. KRANTZ

Washington University

in St. Louis

Real and complex analysis

Partial differential equations

Fax: 314 935 6839

E-mail: sk@math.wustl.edu

GOONG CHEN

*Texas A&M University**

Applied and computational PDE's

Vibration control, nonlinear and

chaotic systems

Engineering mechanics, molecular

quantum mechanics and

quantum computing

Fax: 979 862 4190

E-mail: gchen@math.tamu.edu

RICHARD M. ARON

*Kent State University**

Functional analysis

Infinite-dimensional

function theory

Fax: 330 672 2209

E-mail: aron@math.kent.edu

Founding Editor: RICHARD BELLMAN

Editor 1985–1991: R.P. BOAS

DIVISION EDITORS

RAUL CURTO

*University of Iowa**

Single and multivariable operator theory

C^* -algebras

Classical theory of moments

HÉLÈNE FRANKOWSKA

CNRS and Université Pierre et Marie Curie (Paris 6)

Set-valued, nonsmooth, convex and nonlinear analysis

Viability theory

Differential inclusions, control problems, and

differential games with state constraints

Regulation of systems evolving under

nonstochastic uncertainty

PAUL SACKS

*Iowa State University**

Inverse problems

Nonlinear parabolic partial differential equations

ULRICH STADTMUELLER

Abteilung Mathematik III

University of Ulm

Probability

Statistics

Classical analysis

RODOLFO H. TORRES

*University of Kansas**

Harmonic analysis and its applications

T. WITELSKI

*Duke University**
